WUGH PRIMARY SCHOOL Medicine Policy

Aim:

The aim of this policy is to effectively support individual children with medical needs and to enable pupils to achieve regular attendance.

Overview:

- Parents are strongly encouraged to administer medicines to their children outside of the school day.
- **Medicines will only be administered on the school site when there is no other alternative**, and when failure to do so would be of detriment to the child's health.
- Non-prescription medicines will **never** be administered by a member of staff.
- Parents must complete **Form 3B** before any medicines are administered on site.
- Staff must keep a record of any medicines administered on site (**Form 6**).
- Medicines must be kept in the labelled containers in the school office or staff room refrigerator (where refrigeration is necessary).

Procedures for managing prescription medicines which need to be taken during the school day

- Medicines should only be taken into School when essential; that is where it would be detrimental to a child's health if the medicine were not administered during the school day.
- The School will only accept medicines that have been prescribed by a doctor, dentist, nurse prescriber or pharmacist prescriber.
- Medicines will always be provided in the original container as dispensed by a pharmacist and include the prescriber's instructions for administration.
- Medicines should be brought and collected by a responsible adult.
- **The School will never accept medicines that have been taken out of the container as originally dispensed nor make changes to dosages on parental instructions.**
- It is helpful, where clinically appropriate, if medicines are prescribed in dose frequencies which enable them to be taken outside school hours. Parents are encouraged to ask the prescriber about this. **It is to be noted that medicines that need to be taken three times a day could be taken in the morning, after school hours and at bedtime.**

Procedures for managing prescription medicines on trips and outings

- The School encourages children with medical needs to participate in safely managed visits. The School will consider reasonable adjustments to enable children with medical needs to participate fully

s might also include risk assessments for

Staff will always be aware of any medical needs, and relevant emergency procedures. A copy of any health care plans will be taken on visits in the event of the information being needed in an emergency.

Procedures for managing prescription medicines during sporting activities

- Any restrictions on a child's ability to participate in PE will be recorded in their individual health care plan. All adults will be aware of issues of privacy and dignity for children with particular needs.
- Some children may need to take precautionary measures before or during exercise. Children need immediate access to necessary specific medicines, such as inhalers (see section: children carrying and taking their medicines themselves).

Roles and responsibility of staff managing administration of medicines

- Medicine will only be administered by the School when essential; that is where it would be detrimental to a child's health if the medicine were not administered during the school day
- No child will be given medicines without their parent's written consent (it is only necessary to seek consent from one parent).
- Any member of staff giving medicines to a child will check:
 - the child's name
 - prescribed dose
 - expiry date
 - written instructions provided by the prescriber on the label or container.
- If in doubt about any procedure staff will not administer the medicines but check with the parents or a health professional before taking further action. If staff have any other concerns related to administering medicine to a particular child, the issue will be discussed with the parent, if appropriate, or with a health professional attached to the School.
- **Staff administering medicine will complete and sign a record each time they give medicine to a child. Form 6** will be used for this purpose.

Parental responsibilities in respect of their child's medical needs

- Parents should not send a child to school if he/she is unwell.
- Parents must inform the school and after school setting (e.g. After School Club) about any particular needs before a child is admitted or when a child first develops a medical need. **The school and setting need separate notifications.**
- It must be a Parent (includes any person who is not a parent of a child but has parental responsibility for or care of a child) who gives consent for medicines to be administered.

every effort to arrange for medicines to be
of the school day, or to come into school
ines themselves.

- Parents should encourage children to self-administer medicines, where it is appropriate to do so.
- Parents must inform the school about any medicine that is to be administered during the school day
- Parents must complete **Form 3B** before any medicine can be administered by a member of staff.

Non-prescription medicines

- Staff will **never** administer non-prescribed medicines to children.

Assisting children with long-term or complex medical needs

- Where a child has a long term medical need, a written health care plan will be drawn up with the parents and health professionals.
- Parents must inform the school and after school setting (e.g. After School Club) about any particular needs before a child is admitted or when a child first develops a medical need. **The school and setting need separate notifications.**

Children carrying and taking their medicines themselves

- The school encourages children to take responsibility for the management of their own medicines.
- Older children with a long-term illness should, whenever possible, assume complete responsibility under the supervision of their parent. Children develop at different rates and so the ability to take responsibility for their own medicines varies. This is borne in mind when making a decision about transferring responsibility to a child.
- Where a decision to transfer responsibility to a child has been made, the parent must complete **Form 7** and return it to school. This form is a record that the parent consents to the child carrying and managing their own medicine
- If children are able to take their medicines themselves, staff may only need to supervise, though the medicine should still be stored by the school.

Staff training in dealing with medical needs

- Staff will have appropriate training as and when is required
- New members of staff are made aware of the medicines policy and procedures during a health and safety induction meeting, held within the first month of employment.
- In the event of a child with specific medical needs joining the school, the school will seek advice on staff training needs from the LEA.

school or setting about the medicines that their
provide details of any changes to the

prescription or the support required. However, staff should make sure that this information is the same as that provided by the prescriber. Medicines should always be provided in the original container as dispensed by a pharmacist and include the prescriber's instructions.

- In all cases where medicine is to be administered by a member of staff, parents must complete and return **Form 3B** to ensure that details of medicines are recorded in a standard format. Staff should check that any details provided by parents, or in particular cases by a paediatrician or specialist nurse, are consistent with the instructions on the medicine container.
- The school will keep a record of any medicines administered by staff (**Form 6**). This record will be completed by the member of staff administering the medicine.
- **All records** relating to medicines **will be kept in the school office** with the first aid boxes, accident/near miss records, emergency medicine and a medicine to be administered on site container.

Safe storage of medicines

- Large volumes of medicines should not be stored.
- Staff will only store, supervise and administer medicine that has been prescribed for an individual child.
- Medicines will be stored strictly in accordance with product instructions (paying particular note to temperature) and in the original container in which dispensed.
- Staff should ensure that the supplied container is clearly labelled with the name of the child, the name and dose of the medicine and the frequency of administration. This should be easy if medicines are only accepted in the original container as dispensed by a pharmacist in accordance with the prescriber's instructions.
- Where a child needs two or more prescribed medicines, each should be in a separate container. Non-healthcare staff should never transfer medicines from their original containers.
- All emergency medicines, such as asthma inhalers and adrenaline pens, should be readily available to children and should not be locked away.
- The school allows children to carry their own inhalers.
- **Other non-emergency medicines are kept in a labelled box with the medicine records folder in the school office. Those medicines which need to be refrigerated are kept in an airtight container, which is clearly labelled, in the staff room refrigerator.**
- Any medicine to be administered by staff must be given to the School Business Manager at the start of the day and taken to the labelled container in the school office, or labelled container in staff room refrigerator (in the case of medicines which need to be refrigerated). **Children are not usually permitted to carry medicine themselves,** apart from inhalers which may be needed throughout the school day.

specific cases where medication is needed
may and it is more practicable for the child to
them. If this is the case, the headteacher's
permission must be sought, and **Form 7** must be completed by the
parent.

Risk assessment and management procedures

- Risk assessments for first aid provision and the management of medical conditions will be carried out on a regular basis by the Risk Assessments Co-ordinator

For all other document and information please refer to the Medical Conditions at School Management Resource pack . available in the school office.
